BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

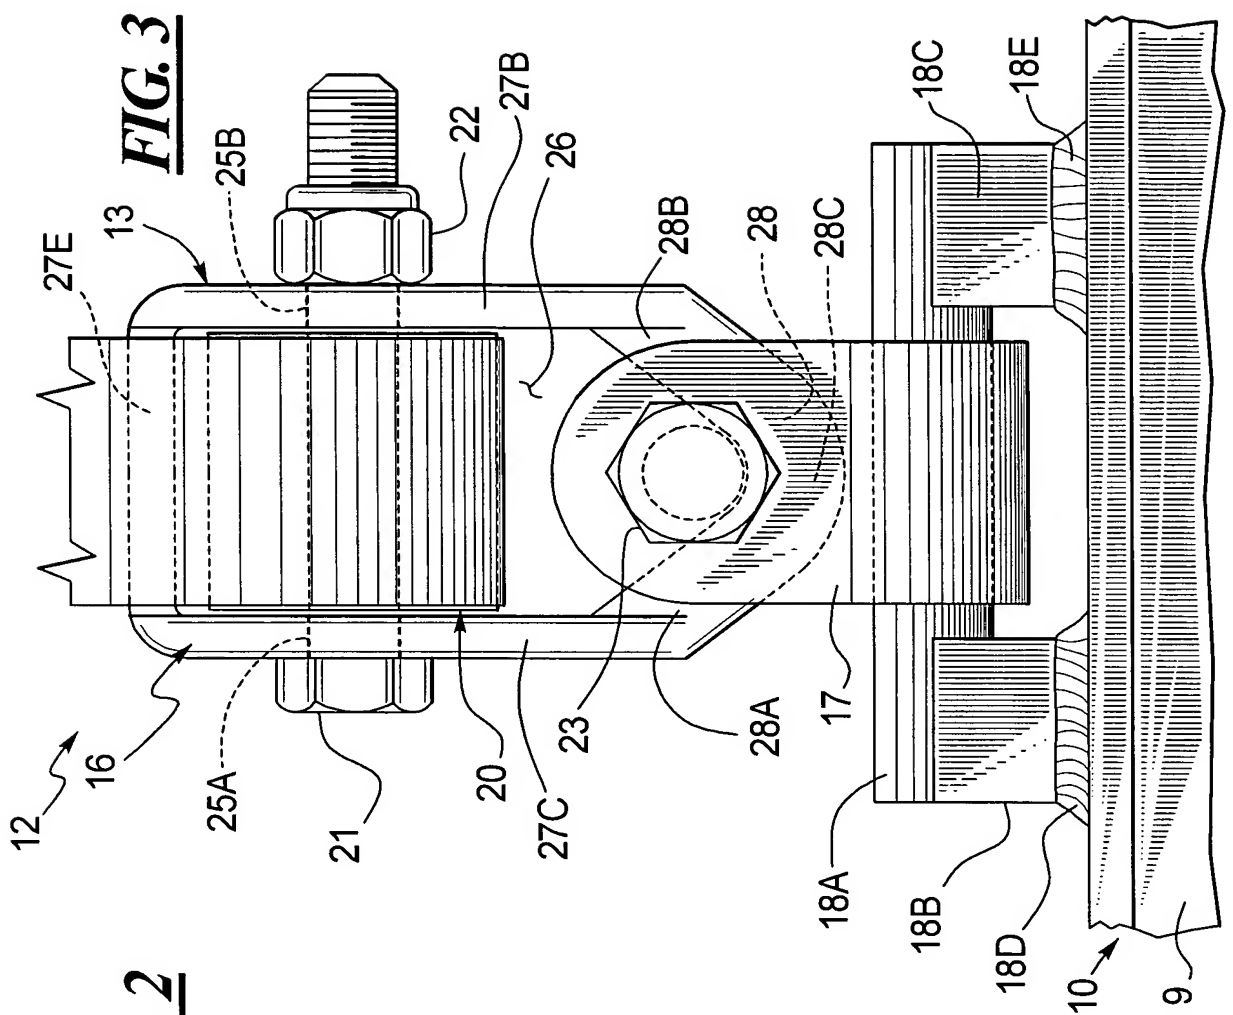

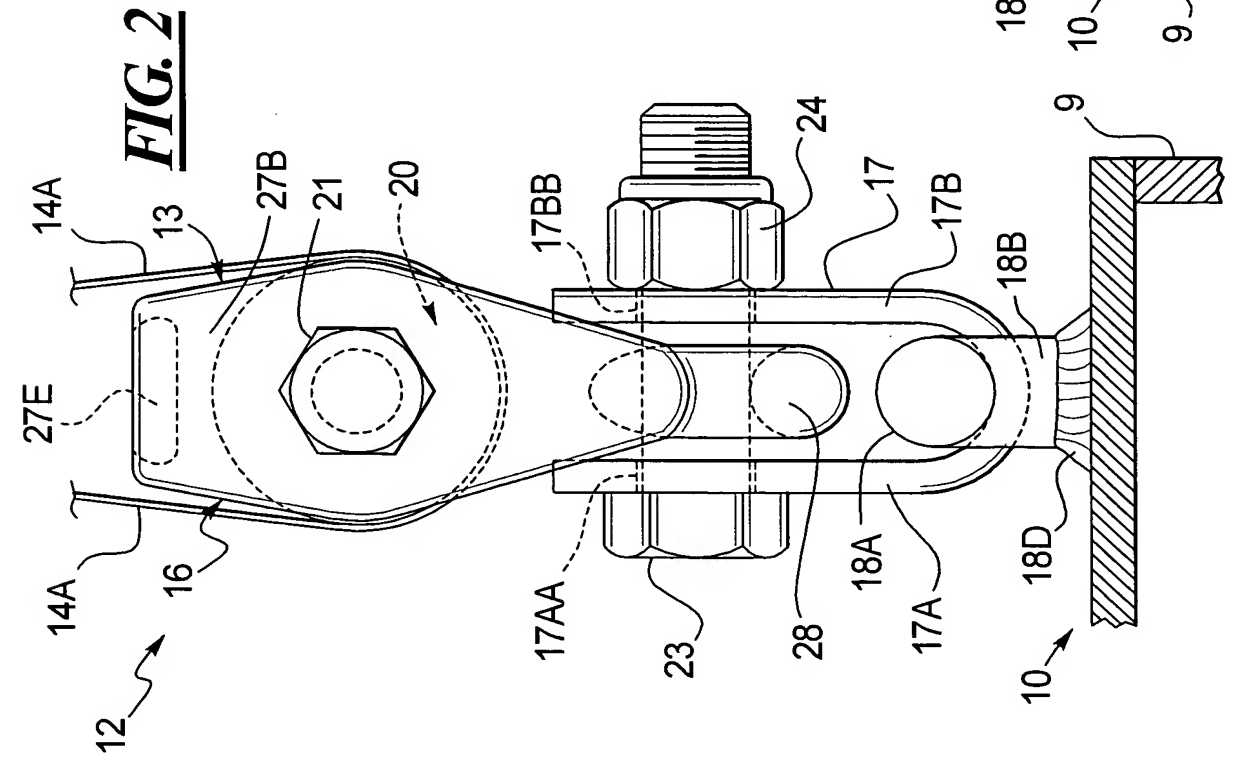

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

FIG. 1 is a schematic diagram of a circular disk 20. The disk has a central circular hole 20A. The entire area of the disk, excluding the hole, is filled with diagonal hatching lines. A curved arrow points from the label 20 to the outer edge of the disk, and a curved arrow points from the label 20A to the inner edge of the central hole.

A cross-sectional view of a circular structure 30. The structure consists of a central circular core surrounded by four concentric layers. The layers are labeled 30A, 30B, 30C, and 30D from the innermost to the outermost. Layer 30A is the innermost layer, followed by 30B, 30C, and 30D as the outermost layer. Each layer has a different hatching pattern: 30A has diagonal lines from top-left to bottom-right, 30B has diagonal lines from top-right to bottom-left, 30C has horizontal lines, and 30D has vertical lines. The central core is a solid white circle.
